

Analytical Chemist II

A growing Topical Pharmaceutical Lab in Petaluma, CA seeks a detail oriented individual for an Analytical Chemist II. This team member will provide general support for the Analytical Department via research, development, and manufacturing activities. The Chemist II tests raw materials, in-process materials, and finished pharmaceutical products using physical, wet chemistry, and instrumental techniques. They will document laboratory work in compliance with regulations while preparing draft documents and technical reports.

Successful individuals will have the ability to independently perform and document laboratory work as well as identify problems and provide troubleshooting of analytical methods and equipment. They will interpret data, compare data to specifications, assist in experimental design and/or protocol development, and prepare reports for laboratory test results. Accurate calculations and documents will be performed in compliance with GLP/cGMP procedures.

At a minimum candidates will have a Bachelor's degree in Chemistry, or related scientific field, plus three years working experience in a pharmaceutical analytical laboratory environment, or equivalent experience. Preferred candidates will have a Master's degree in Chemistry, or related scientific field, with exposure to analytical laboratory environment. Successful candidates will have expert analytical laboratory skills including pharmaceutical Quality Control techniques and will have the demonstrated ability to maintain a safety and quality focus.

This individual must be able to effectively communicate with the Supervisor and project team members. They must be willing to learn and follow directions while working independently and as a part of the team. The ability to work with computers (including Microsoft Word and Excel) and general laboratory instrumentation is also required. Successful candidates will possess strong problem resolution and project management skills, be organized and work well under pressure in a dynamic environment.

Candidates may be required to move items weighing up to 25 pounds. They must have sufficient manual dexterity to perform laboratory and cGMP operation in a manner to provide precise and accurate results while working in a safe manner. The Chemist II is required stand for long periods of time to perform laboratory work and have suitable vision for performing detailed inspections.

This is a full-time regular position offering a competitive salary and benefits package in a friendly work environment. Salary and grade level will be commensurate with experience and education level.
